It's DIFFERENT

Flais has been built on the simple philosophy of giving back something different to the community than what we borrow from it. We design concepts that are exceptionally aesthetic and pleasing both functionally plus visually. Flais aims at delivering towards the need of the hour, we desire to fulfil what market requires today and in the coming years from today.

THE STORY GOES ON...

We've examined the most primitive of marbles over the years and have brought back the very best of material for you. The story of the Marvel collection is based upon the philosophy of bringing both, authentic and aesthetic ceramics and giving it an exemplary form of design.

THE HARMONY OF THE SPACES

A system fostered by the dialogue between the architect and the FLAIS collections; combinations that end in a beautiful and solid materiality expression of its ultimate meaning and purpose. With this approach we present all of our new catalogues that are a walk through the divergent environments of our world, a range of pieces, formats, textures and colours to enhance and sensitively elaborate the many styles of contemporary architecture.

GLOBAL DESIGN PARTNER

We believe in bringing the world together through the world of good ideas, innovations and design. Building partnerships that go beyond the boundaries of the nation and connect us with the world is what keeps us going. Doing business in various parts of the world enables us to grow and enhance our experience of building meaningful relationships.

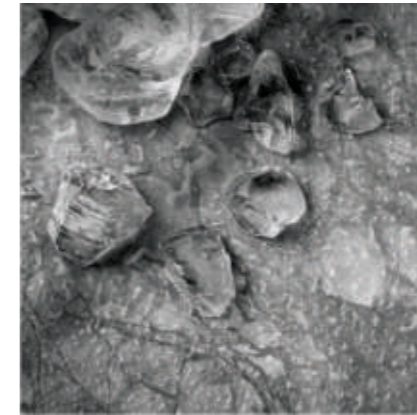

TECHNICAL ADVANTAGES

This collection is incorporated with all the technical advantages that a surface could be possibly be built with, it is not only easy to clean, but is also resistant to water, fire, frost, chemicals, stains and scratch. It's outstanding and marvelous finish allows it to shine amongst others and is capable enough to decorate any space it is equipped into.

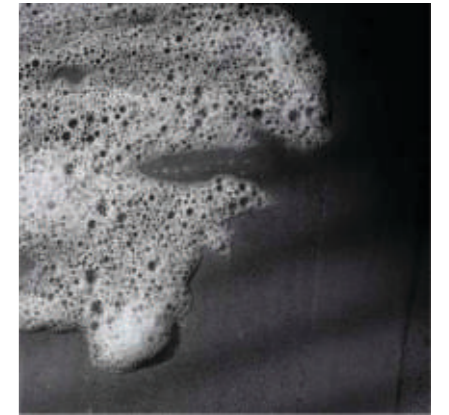

This collection is made up of multiple pieces of versatile art that provide your space with unparalleled excellence. Your space automatically transforms itself into an opulently indulgent and distinctively luxurious area of existence. This will revolutionize the idea of ceramics because not only does it breathe subtlety and elegance but is also a reinterpretation of the functional design.
